

SECURE *medical*®

About Secure Medical

Secure Medical was originally founded as a group of startups that eventually integrated into one another over the years. Kyle Rao, our President and ASU Business Graduate, was only 20 years old when he started our company with his father. Since then, we have grown to service not just Arizona, but the entire US.

Over our 20-year tenure we have developed a perfect system to handle telemedicine with our own board of doctors specifically hired to service patients in all fields of medicine. Though this is not our only capacity, it is the main drive behind our ethos here at Secure Medical. We maintain this model and all necessary regulatory compliance (HIPAA, LegitScript, VIPPS, FDA regulations, etc.) by staying involved in the telemedicine community.

Secure Medical is based out of Phoenix, Arizona

A LITTLE BIT OF HISTORY

SMI

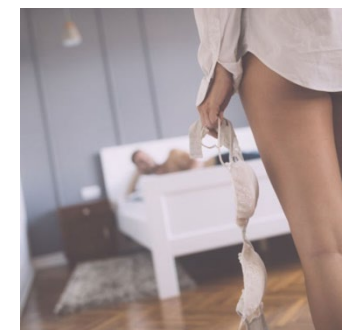

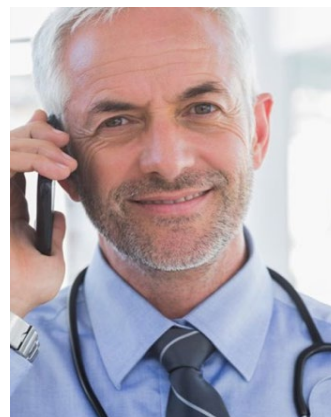

Secure Medical has built the necessary infrastructure to connect doctors straight to patients, without the need for costly insurance premiums or long arbitrary litigation. We apply this model mostly in the lifestyle category.

These products and services include the ability to meet with a doctor either through video or a phone call depending on patient wishes and necessary state regulations, obtain a prescription for a myriad of medical illnesses, and have the prescription sent discreetly to their door or pharmacy at their discretion. We apply this in many ways:

Healthcare

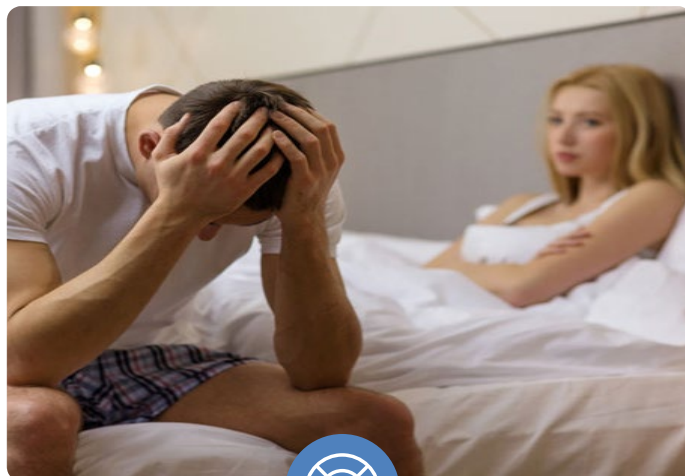

Technology
